ENTERPRISE NETWORK SOLUTIONS

# BIOGRAPHY

David Zukerman

President and Chief Financial Officer

David Zukerman is President, Chief Financial Officer, and co-founding partner-owner of Vector Resources, Inc.

Vector Resources designs, implements and maintains integrated voice, video and data networks for Fortune 500 companies, global shipping and logistics companies, large urban school districts, major research hospitals, and all variety of small and medium-sized businesses.

Founded in 1988, Vector is today one of the fastest-growing systems integration firms in the Southwestern United States - and beyond.

As President and CFO, Mr. Zukerman ensures that all lines of business within Vector Resources are running efficiently and within budget. Mr. Zukerman works with his fellow owners on the company's strategic plan to help generate revenues, create new opportunities for business and to help the company to remain competitive in the marketplace. Mr. Zukerman places strong emphasis on quality products, customer satisfaction and cost management as critical components of Vector's overall success. Mr. Zukerman is involved directly in all strategic discussions pertaining to Vector growth plans, including the addition of new offices and employees, strategic mergers and acquisitions, and the pursuit of specific business opportunities that could mean new growth for the company.

Mr. Zukerman's day-to-day responsibilities at Vector Resources include but are not limited to:

- Overseeing the company's Finance, Risk Management and Compliance teams
- Handling investor relations
- Helping to shape the company's overall performance objectives
- Maintaining a strong managerial presence related to Vector's overall operations

Mr. Zukerman holds a Bachelor's of Science degree from Penn State, and a Master's degree in Business Administration from UCLA's Anderson School of Management.

Vector Resources, Inc. is based in Torrance, CA, with offices in San Diego and Rancho Cucamonga, CA; Phoenix, Arizona and Washington, D.C.. The company employs more than 400 people, including swift-moving teams of system integration experts and technicians.
