Vector Resources understands the challenges modern organizations face in providing comprehensive information services with limited resources. Vector offers a variety of cost-effective consulting services that leverage our broad experience in technology infrastructure and operations to help your organization support all of your business needs.

Our Information Technology Consulting Services include:

Information Technology Program/Project Management:

Vector can help your organization develop and implement a technology project of any size, or a complete information technology program. Areas of specialization include enterprise network integration, VoIP telephony, data and premise security, and video solutions.

Network Design/Architecture Services: Let Vector leverage our experience building hundreds of efficient, cost-effective technology networks for clients in a wide variety of industries to provide a robust platform for the information services on which your employees and customers rely.

Business Continuity Planning and Implementation: Our professional consultants can conduct a Business Impact Analysis to determine your organizational reliance on your technology systems, and assist with business continuity planning to assure your organization can continue operations during unforeseen events.

Security Vulnerability Assessment and Remediation Services:

Vector provides a suite of vulnerability assessment services that provide a complete view of your organization's security vulnerabilities, and we can assist with an actionable plan to improve your information security posture.

Please contact Vector today to let us know how we can help your organization design, build and maintain a robust technology infrastructure to support your business.
