

Mission-Critical Security Systems...

Operations Controllers demand information, communications and control.

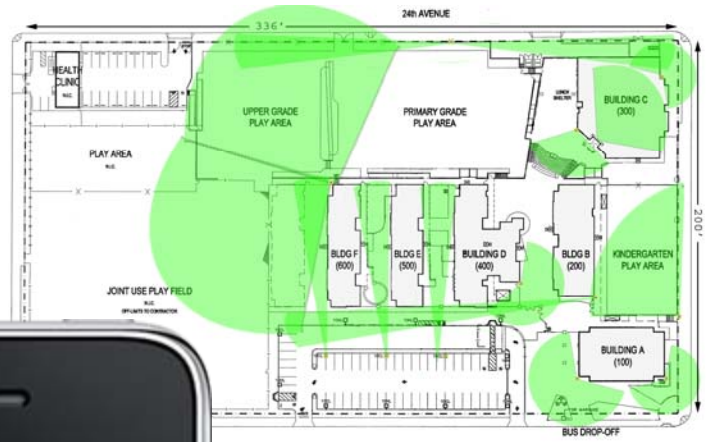

Vector experts design and implement comprehensive Video Surveillance and Access Control systems, combining the best hardware and applications available to keep your facility secure.

System Features:

- Automated Monitoring
- IP and Analog HD Day & Night Surveillance
- Mobile/ Internet Secure Remote Access
- Local and Remote Archival Storage
- Video Analytics
- Integrates with all building access controls

Vector has executed some of the largest and most demanding 24/7 video surveillance projects in the nation. Our clients include Shipping Terminals, School Districts, Hospitals, and Government facilities.

Customized Viewsets provide precise information for critical decisions. Hundreds of cameras can be organized and accessed remotely by authorized users.

Camera Maps define all surveillance regions, and display targeted areas where alerts have been triggered.

Automated Real-time Analytics captures identifying data and delivers it to operations managers for analysis.

Remote Mobile Access enables authorized users to view live PTZ cameras or archival video anytime, from anywhere.

System Health Tools allow for instant monitoring and management of your security network.
